Two-factor authentication

 Two-factor authentication is not enabled yet.

Two-factor authentication adds an additional layer of security to your account by requiring more than just a password to sign in.

[Enable two-factor authentication](#)

[Learn more](#)

Enable two-factor authentication (2FA)

Setup authenticator app

Authenticator apps and browser extensions like [1Password](#), [Authy](#), [Microsoft Authenticator](#), etc. generate one-time passwords that are used as a second factor to verify your identity when prompted during sign-in.

Scan the QR code

Use an authenticator app or browser extension to scan. [Learn more about enabling 2FA](#).

Unable to scan? You can use the [setup key](#) to manually configure your authenticator app.

Verify the code from the app

[Cancel](#) [Continue](#)

Alternative 2FA option:

SMS authentication

[Select](#)

Get one-time codes sent to your phone via SMS to complete authentication requests.

Two-factor authentication (2FA) is now
enabled for your GitHub account

You have enabled two-factor authentication using your authenticator app.

Don't get locked out, configure additional authentication methods

Configuring additional authentication methods will help you gain access to your account in case you lose your device and don't have your recovery codes.

Passkeys

Passkeys are webauthn credentials that validate your identity using touch, facial recognition, a device password, or a PIN. They can be used as a password replacement or as a 2FA method.

Add a passkey →

Security keys

Use your device with Touch ID, Windows Hello, etc or a physical security key (e.g. YubiKey)

Manage

GitHub Mobile

The GitHub Mobile app on your phone can be used as a 2FA method. Enable it by installing the GitHub Mobile app for [iOS](#) or [Android](#) and signing in to your account.

Install →

Done

2. Repositorios creados

DavidNunez-cyber/DavidNunez-cyber is a special repository; its README.md will appear on your profile!

The screenshot shows a GitHub interface for editing a README file. At the top, it says "DavidNunez-cyber / README.md in main". On the right, there are buttons for "Cancel changes" and "Commit changes...". Below the header, there are tabs for "Edit" (selected) and "Preview". To the right of the preview tab are icons for "Spaces", "2", and "Soft wrap". The main area contains the following text:

```
1 # ¡Hola! Soy David Núñez
2
3 Full Stack Junior (Java 2 años) → Preparándome para Ciberseguridad.
4
5 ## Habilidades
6 - Java, Full Stack básico
7 - Ofimática, WMs (en progreso)
8 - Ciber: principiante (INCIBE, Kali...)
9
10 ## Actual
11 - Itinerarios Pre-Cero/INCLUDE GoodJob
12 - Curso IT/Ciber marzo 2025
13
14
15
```

At the bottom left, there is a note: "Use `Control + Shift + m` to toggle the `tab` key moving focus. Alternatively, use `esc`, then `tab` to move to the next interactive element on the page." At the bottom right, there is a small "H" icon.

3. Edición README perfil
